

EXECUTIVE SUMMARY

Route 57 Build-Out Impact Analysis — Technical Assessment

Objective: To have the Policy Committee acknowledge the completion of the technical assessment.

Considerations: The Route 57 Build-Out Impact Analysis was completed at the request of Onondaga County, under the SMTC's Comprehensive Plan Assistance Block. The SMTC agreed to provide technical assistance related to proposed and potential development of the Route 57 corridor between the New York State Thruway (I-90) and John Glenn Boulevard.

Staff completed two Technical Memorandums. (Enclosed) The first Technical Memorandum summarized the first two tasks: capacity analysis for existing conditions and future traffic volumes and analysis for future (base) conditions. Technical Memorandum #2 summarized the SMTC's work on the third and final task for the analysis, future alternatives assessment.

Staff will provide a brief presentation at the meeting.

Staff Recommendations: The Planning Committee recommended that the Policy Committee acknowledge the completion of the Route 57 Build-Out Impact Analysis.
