

EXECUTIVE SUMMARY

TIP ANTICIPATED EFFECTS NARRATIVE

Objective: To have the Planning Committee recommend that the Policy Committee approve the attached narrative.

Considerations: As required by Congress, a number of items must be adopted by MPOs to fulfill various performance-based planning & programming regulations. One such item is that an MPO Transportation Improvement Program “shall include, to the maximum extent practicable, a description of the anticipated effects of the transportation improvement program toward achieving the performance targets established in the metropolitan transportation plan, linking investment priorities to those performance targets” [23USC §134(j)(2) (D)].

The attached, which is focused on safety performance measures and targets, adheres to this requirement. Further discussion will occur at the meeting.

Staff Recommendations: That the Planning Committee recommend that the Policy Committee approve the attached TIP Anticipated Effects Narrative at their June 12 meeting.
