

2024 Community Streets Project Selection - Hopeprint

This place-making project will create a new social gathering space by pedestrianizing the block of N McBride St adjacent to Amos Park. Public art, outdoor furniture, and planned events will activate the space to create a “center” that affirms neighborhood identity while also improving access to local businesses and increasing multi-modal transportation safety. This project is an outgrowth of Hopeprint’s West Pond Microneighborhood Reinvestment Proposal and will encourage visitors to interact with the space through chalk drawings and other interactive elements.

Project Details

Project Sponsor: Hopeprint
