

Community Streets Funds

To help kickstart the Community Streets Program, [Adapt CNY](#) will be working alongside the City of Syracuse and the SMTC to select up to three projects for the first year to fund. **Only these sponsored projects will be considered as part of this pilot year.**

Your project will be evaluated on:

Cost

The estimated cost for each project must be **under \$3,000**. Use the itemized budget sheet to help.

Feasibility

Your design should make sense for the area and be easy to install with the team you have assembled.

Local Support

Provide proof of support through letters, surveys, and petitions. Showing a variety of support, including local organizations and elected officials, will help strengthen your submission.

Liability Insurance

Projects that are able to provide insurance coverage for the project installation date will be prioritized, but this does not exclude other applicants from the funding.

On top of these evaluation questions, Adapt CNY and the Syracuse Metropolitan Transportation Council (SMTC) will look to select a variety of projects, in terms of design (bike lanes, temporary plazas, bump outs, etc.) and location (spreading projects around the City).

All projects for the 2023-2024 cycle must apply for this funding and decisions will follow the timeline set out in the Guidebook. To apply just follow the steps on the website and be sure to check off the box for Adapt CNY funding!

www.smtcmpo.org/communitystreets/

If you don't receive funding on your application on your first submission, take another look at your design, find ways to improve it, and submit it again next year! We want to see your project come to life in its best form.
